ADVANC-R[®] VACUUM INSULATION PANEL

APPLICATIONS

- ADVANC-R[®] is your answer to achieving higher R-value requirements, especially in re-roofing situations, where there are space constraints preventing a thicker roof profile
 - Re-roofing of commercial buildings
 - New commercial building roofs
 - Residential building with limited slopes

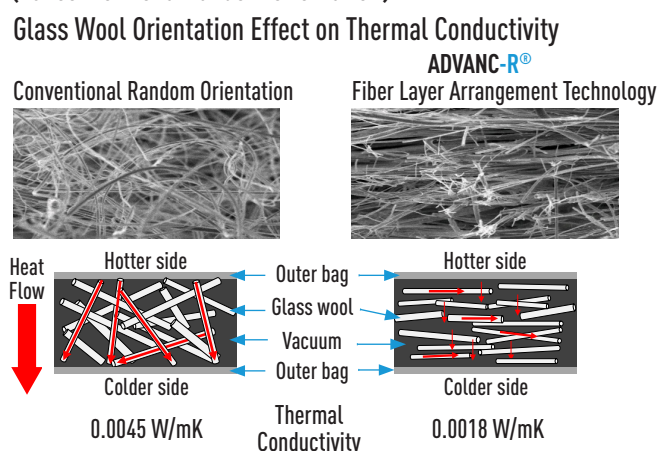

STANDARDS AND APPROVALS

- Intertek ETL: Control Number (CN) 5023792
- ASTM C1484: Super-Insulation Standards
- Factory Mutual 4470: Single-Ply, polymer-Modified Bitumen Sheet, Built-Up Roof (BUR) and Liquid Applied Roof Assemblies for use in Class 1 and Noncombustible Roof Deck Construction

PRODUCT COMPOSITION

- Panasonic's ADVANC-R[®] VIP is comprised of a highly porous glass wool structure, absorbents and adsorbents in a vacuum sealed aluminum laminated bag
- The vacuum drastically reduces the transfer of heat through VIP. Our patented Fiber Layer Arrangement Technology (FLAT) radically improves thermal performance by aligning the glass wool to significantly reduce thermal conductivity by 60% (vs. conventional random orientation)

- ADVANC-R[®] VIP is manufactured in facilities with:
 - OHSAS 18001: 2007 Occupational Health & Safety Management Systems
 - ISO 9001: 2015 Quality Management Systems
 - ISO 14001: 2015 Environmental Management Systems
