

# Automated Guided Vehicle / Autonomous Mobile Robot

## Equipment and Circuit Configuration

### Voltage Sensing / BMS

**Before**

Use WH connector for connecting board to FPC

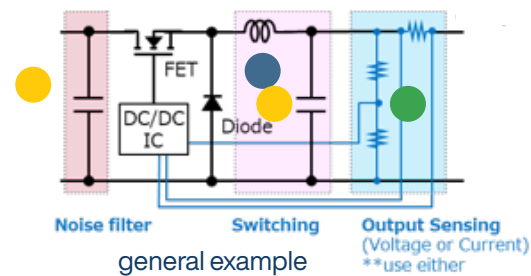

**After**

Directly Connect FPC to control board  
Reduce WH for junction and connector

A

### DC /DC Converter

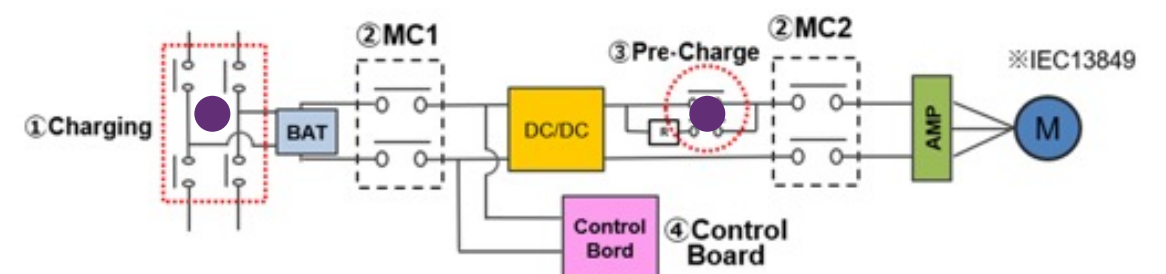

B

### Power (Inverter)

C

### Power Line

D

### Proposed Devices

Hybrid Capacitor

Power Choke Coil

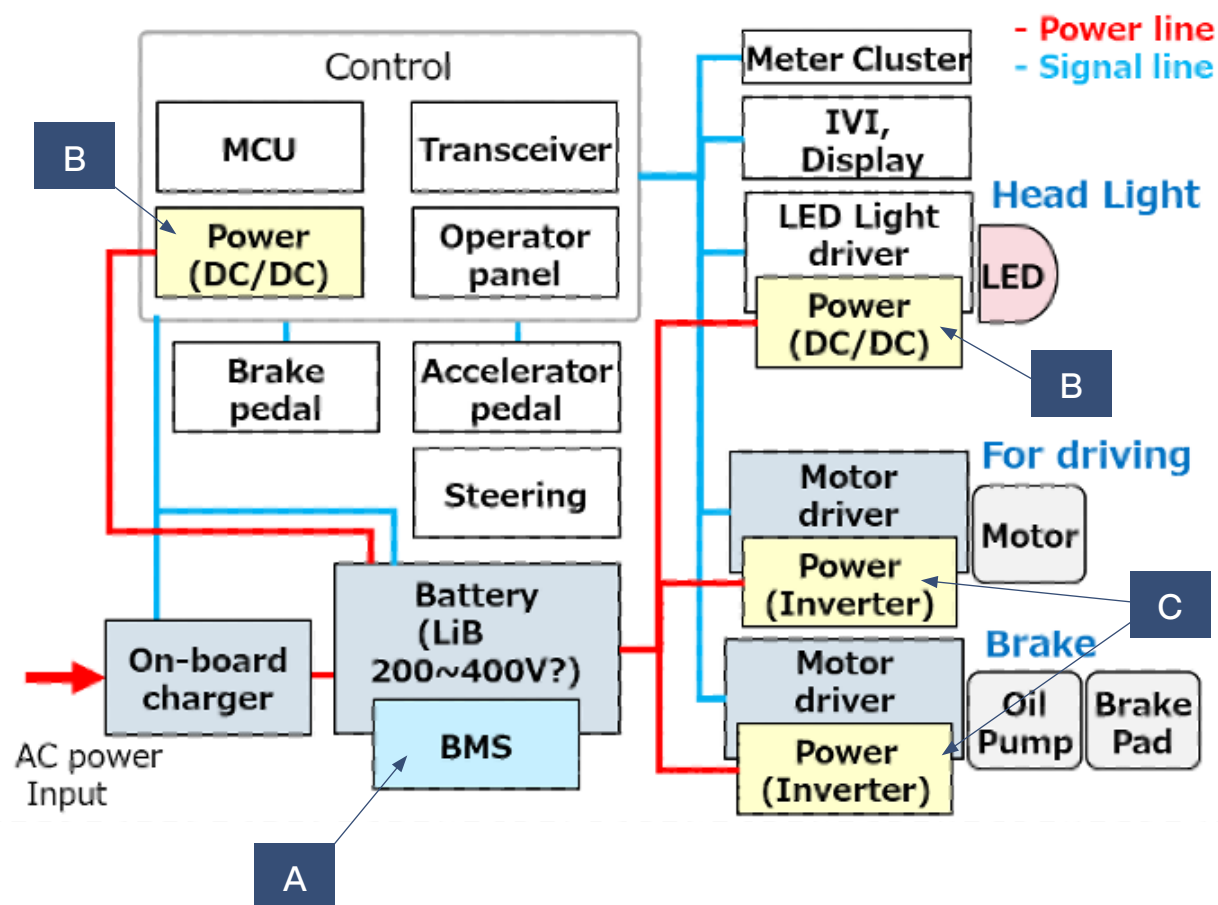

Chip Resistor

PhotoMOS®

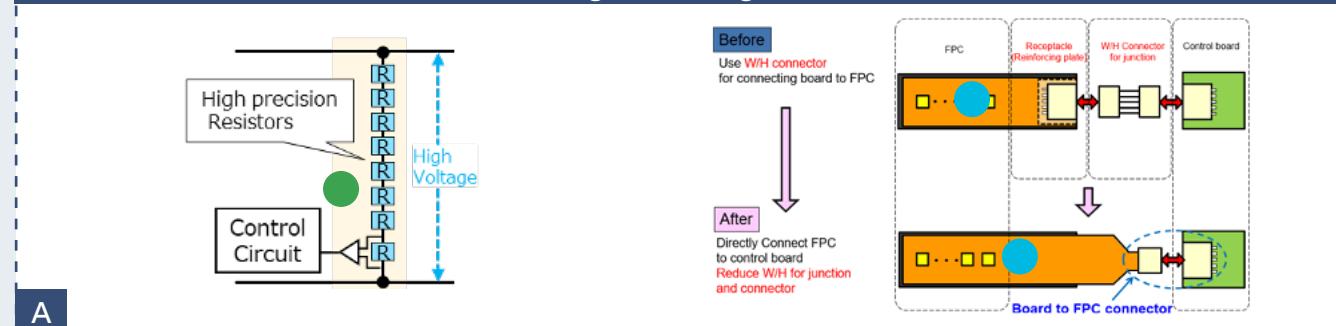

Connector

# Electric Agricultural Machinery

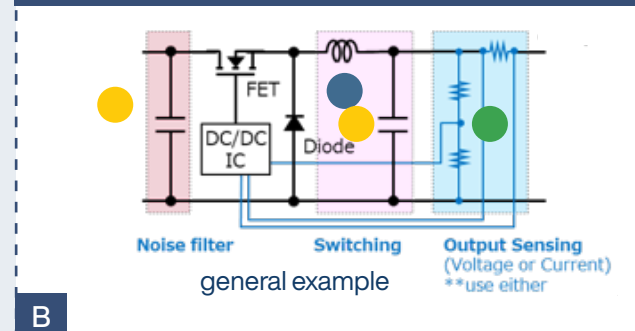

## Equipment and Circuit Configuration

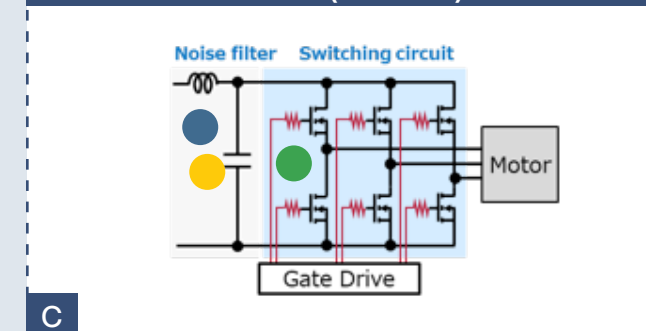

## Voltage Sensing / BMS

## DC /DC Converter

## Power (Inverter)

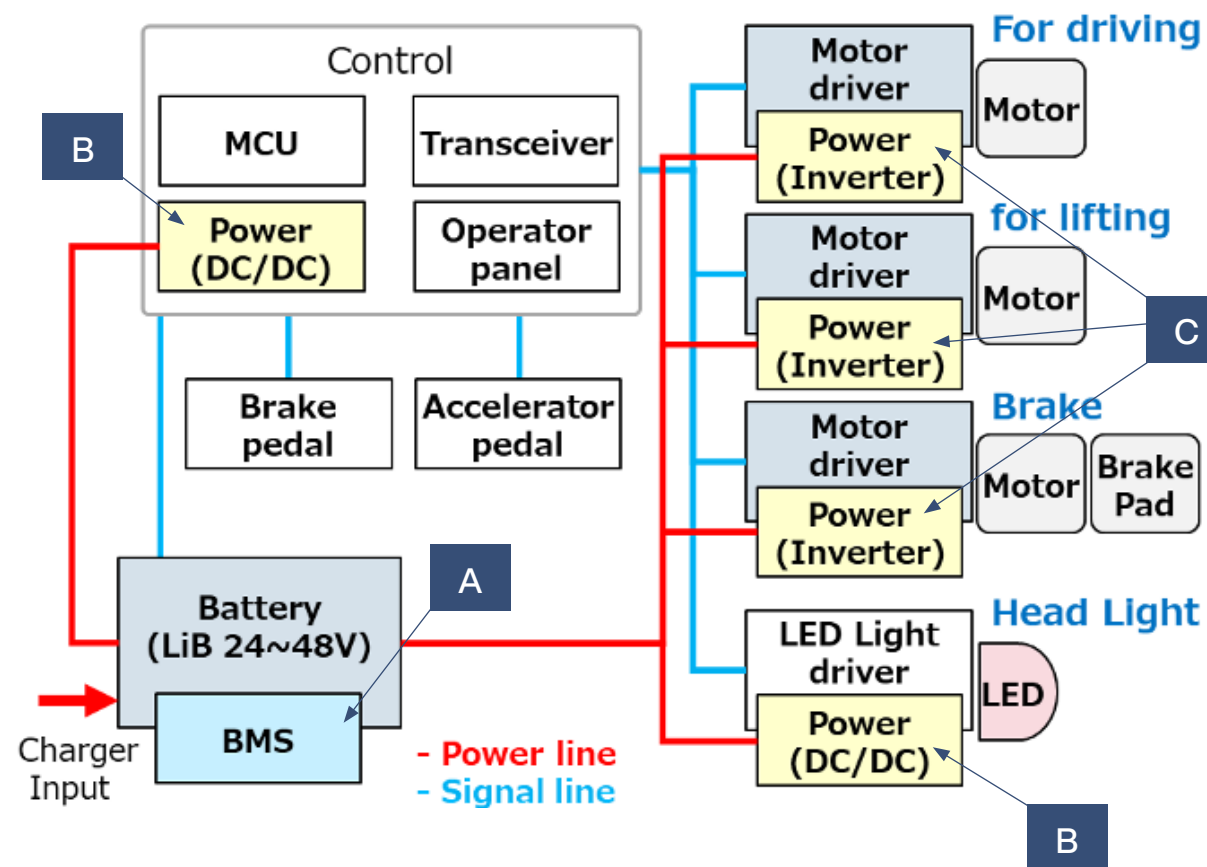

## Proposed Devices

- Hybrid Capacitor
- Power Choke Coil
- Chip Resistor
- Connector

# Electric Forklift

## Equipment and Circuit Configuration

## Voltage Sensing / BMS

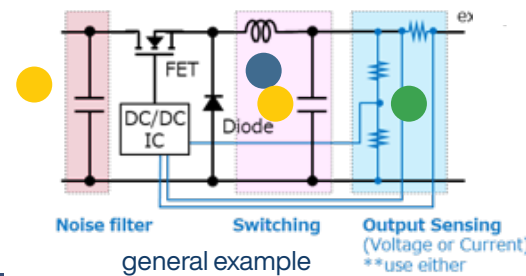

**Before**  
Use WH connector for connecting board to FPC

**After**  
Directly Connect FPC to control board  
Reduce WH for junction and connector

## DC /DC Converter

## Power (Inverter)

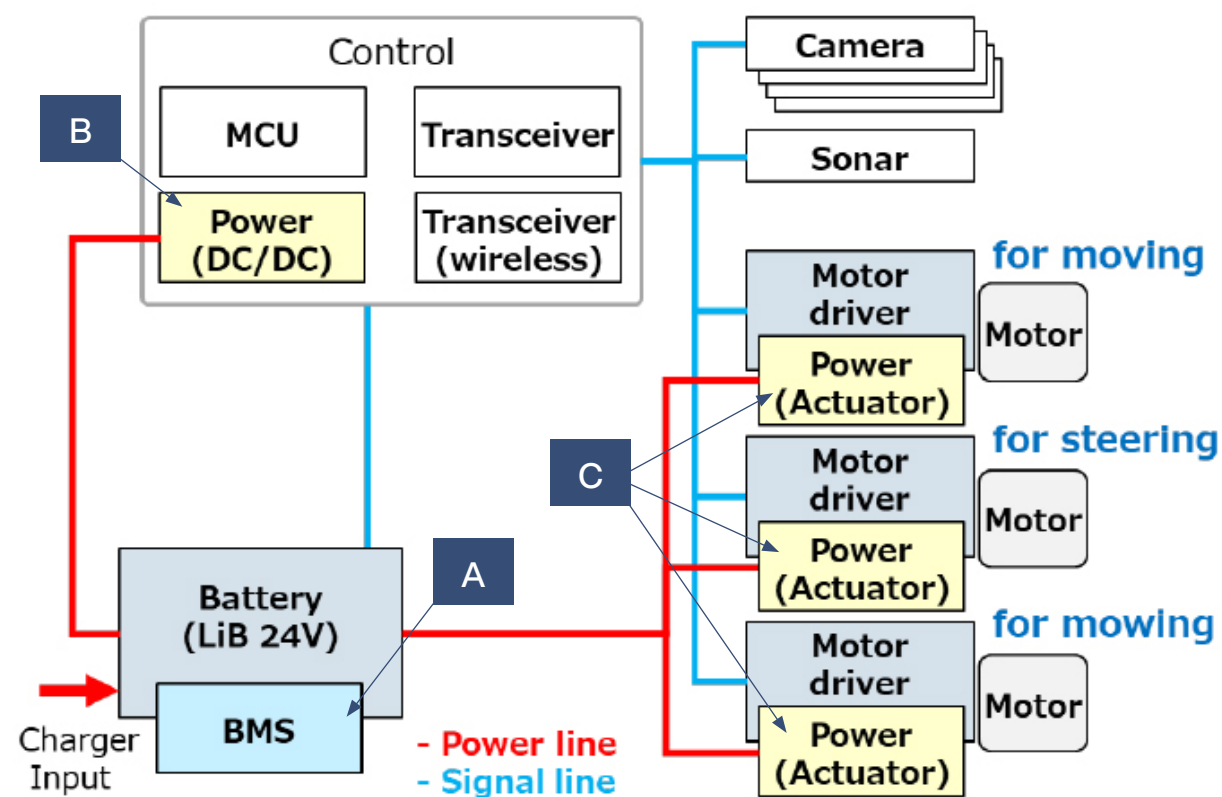

## Proposed Devices

- Hybrid Capacitor
- Power Choke Coil
- Chip Resistor
- Connector
- Mechanical Relay

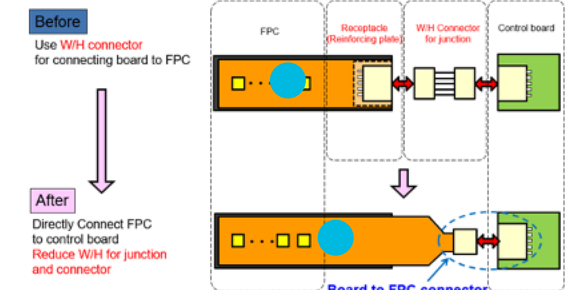

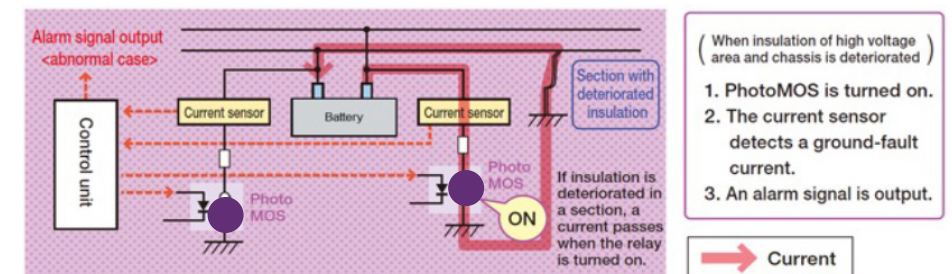

# Electric Autonomous Lawn Mower

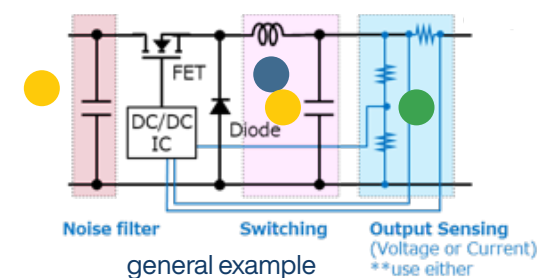

## Equipment and Circuit Configuration

## Leak Detection for BMS / Voltage Sensing / BMS

## DC /DC Converter

## Power (Inverter)

## Proposed Devices

● Hybrid Capacitor

● Power Choke Coil

● Chip Resistor

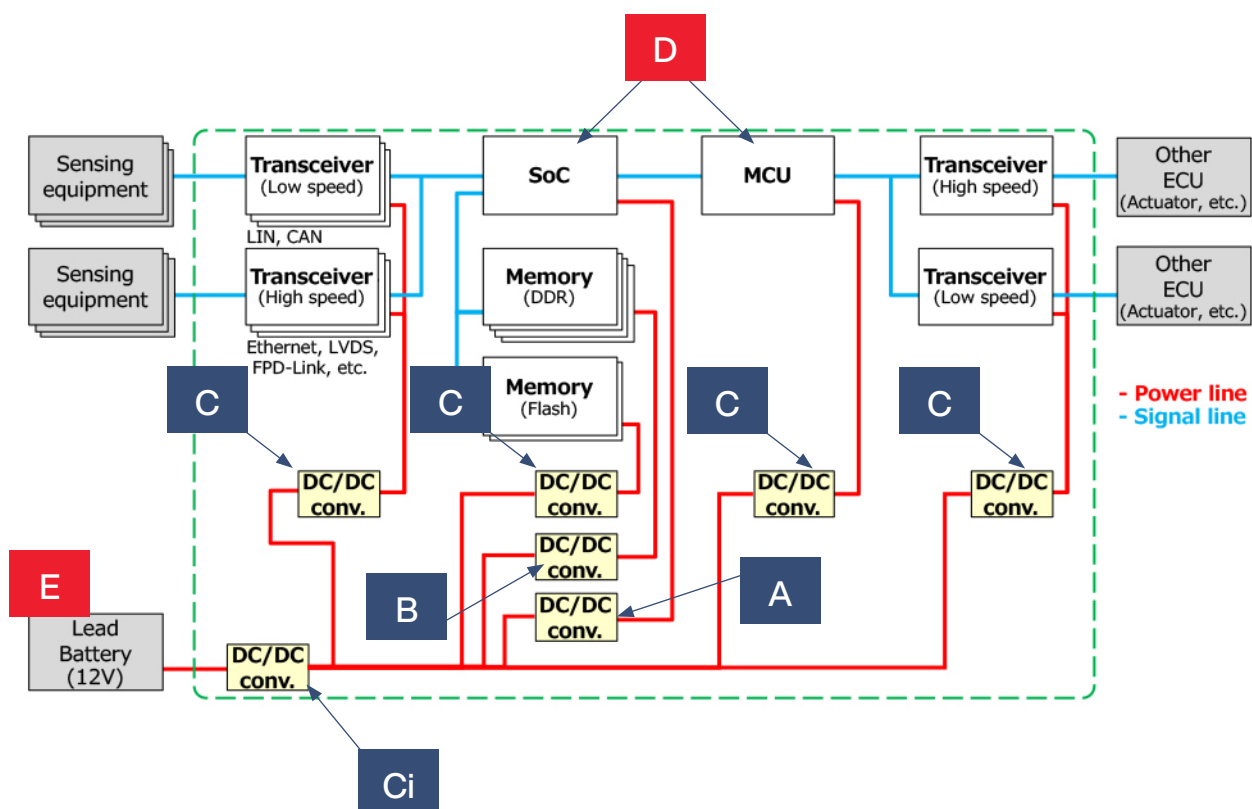

● PhotoMOS®

● Connector

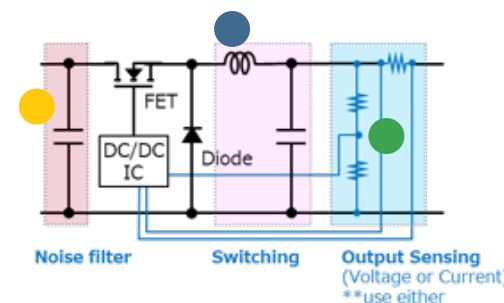

# Advanced Driver Assistance System (ADAS)

## Equipment and Circuit Configuration

## DC /DC Converter

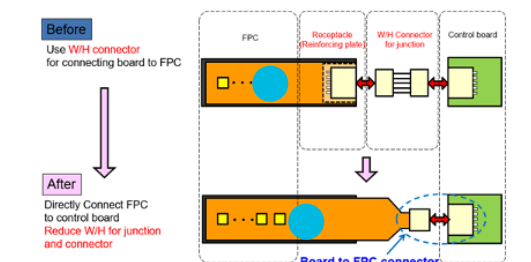

A, B, C, Ci

## Cooling Fans for Heat Dissipation

## BMS Connection

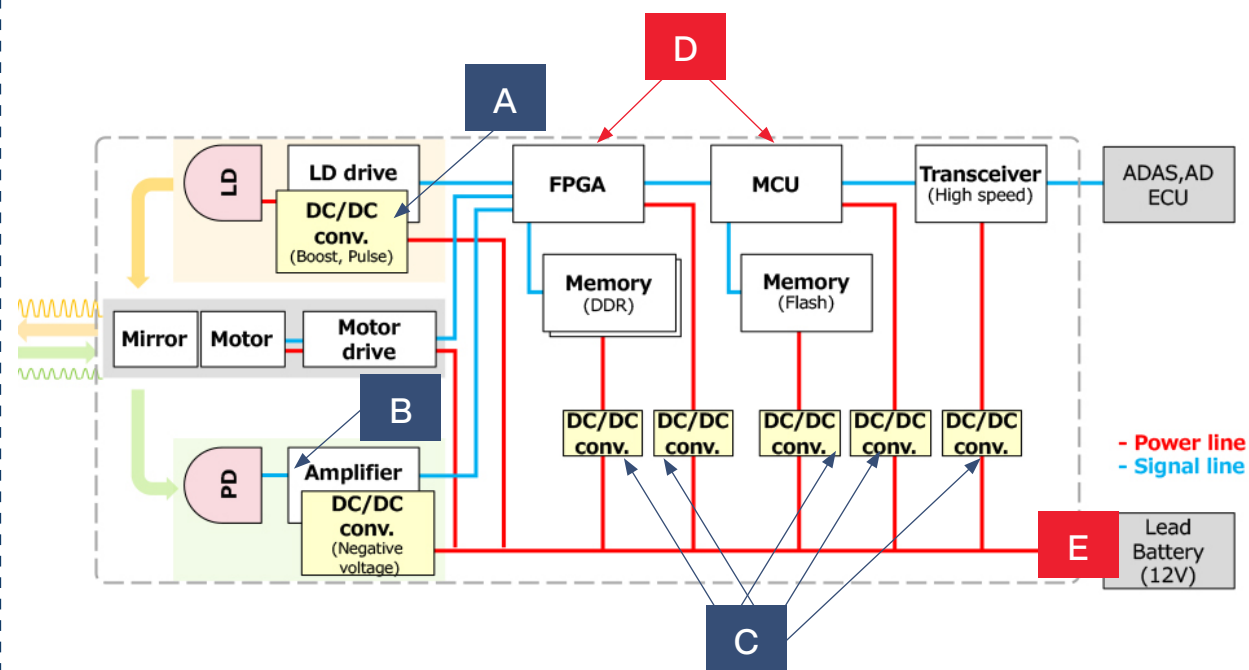

## Proposed Devices

# LiDAR

## Equipment and Circuit Configuration

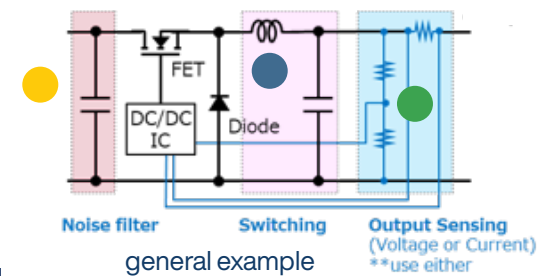

### LD Irradiation Circuit

### PD Light Receiving Circuit

### DC /DC Converter

### Cooling Fans for Heat Dissipation

### BMS Connection

### Proposed Devices

- Hybrid Capacitor
- Power Choke Coil
- Chip Resistor
- Connector
