

## Line Extension

### EVP-BB Series 2.6mm x 1.6mm, SMD, Top Push Tactile Switches

#### Now With 3.0N Operating Force and 500K Operating Life!

Panasonic, a worldwide leader in Electromechanical Products, announces the expansion of the **EVP-BB Series Tactile Switches**. This new Switch features a higher operating force of 3.0N and an operating life of 500K, which allows for stronger prevention against misoperations/accidental activations. The **EVP-BB5AHE000 Switch** is IP67 rated with a sealed top that enables the Switch to be dust and water-resistant. At 2.6 x 1.6 x 0.57mm, the Panasonic **EVP-BB5AHE000 Tactile Switch** is one of the smallest switches in the industry. With the addition of this new Switch, the EVP-BB Series of Tactile Switches will offer our customers more options for operating force in their designs than ever before.

## Features and Benefits

- High Click Ratio for A Crisp, Tactile Feel
- IP67 Sealed to Help with Waterproof/Dustproof
- High Operating Life and Operating Force @ 500K Cycles and 3N
- Low Profile and Small Size to Allow Downsizing of Customer Product

## Industries

- Industrial
- ICT / Wearables/Small or Mobile Electronics
- Automotive
- Medical

## Applications

- Human Interface Control panel, Smart Thermostat, Smart Meter
- Smart Phones, Ear Buds, Speakers, AR Glasses, Hand Scanners
- Human User Interface Switch/Controls
