

Line Extension

EVP-BD, EVP-0B, EVP-CD, EVP-BX Series

6.0mm x 6.0mm, SMD, Top Push 2 Terminals Tactile Switch

This Series has been expanded to include the EVP-BX (Quiet Type) Tactile Switches!

These new switches add a silent type variation to the lineup and are offered in 4N and 6N operating forces. The EVP-BX tactile switches offer an operating life of 200,000 cycles, making them suitable for automotive, audio, and industrial equipment.

The addition of the EVP-BX switches fills the gap for a silent type switch in this lineup, giving designers more flexibility when it comes to click noise and tactile feel.

Features and Benefits

- High Click Ratio Offers a Crisp Tactile Feel
- Silent Operation allows for Low Click Noise
- High Operating Life and Operating Force
- Low Profile and Small Size

Industries

- Industrial
- ICT/Wearables/Small or Mobile Electronics
- Automotive
- Medical

Applications

- Human Interface Control Panel, Smart Thermostat, Smart Meter
- Smart Phones, Ear Buds, Speakers, AR Glasses, Hand Scanners
- Human User Interface Switch
- Human Interface Controls
