

SUBJECT: Malaysia Factory Label Change**BULLETIN #:** PCN.PG44.11.19.10 Malaysia Label Change**Date:** 11-19-2010

Panasonic's Malaysia factory is implementing a new Logistics Warehouse system (LWS) to strengthen and improve the out-bound logistics and finished goods inventory control. This new system will go live December 2010. Due to this new system there will be some changes in the format of our current labels attached to the products and packaging. This is related to the "C3 label" and does not affect the labeling on the outer box and customer labels. This change is the data field configuration only and does not affect the lot traceability since no information has been dropped.

Below we have provided both the current and new label specifications for your reference. As the changes are minimal, we do not expect any issues on the customer receiving end. If there are any concerns or questions please contact:

Vince Pastor
Sr. Product Specialist
